An excellent IRC season start for nke with the victory of the 10R (First 34.7) nke Marine Electronics at the Key West Championship and the one of the 40.7 of our partner Thierry Bouchard for the Primo Cup.

The 10R (First 34.7) **nke Marine Electronics** won the Key West Championship, the largest regatta in the USA. The **nke** Marine Electronics boat, the Beneteau R10 was prepared by Annapolis Yacht Sales and equiped by our importer Euromarine. The boat and its crew made a five days wonderful race for this international regatta which took place in ideal conditions and with an exceptional competition spirit.

Another good news is the victory of our partner Thierry Bouchard on his 40.7 for the Primo Cup for two times in a row. This race took place in the Principality of Monaco in the South of France and brought there some of the best racing yachtsmen from thirteen diferent countries, who could show all their talents, with all kinds of weathers.

This is a promising 2007 season start for **nke**, which proves all the performance and reliability of **nke** electronics equipment.
